FOREWORD

The Pupils' Performance Report for Bhutan Certificate of Secondary Education (BCSE X) for December 2006 examination was published for the first time in the year 2007, five years after the then Bhutan Board of Examinations (BBE) took over the Class X examination from the Council for the Indian School Certificate Examinations (CISCE, India) in 2001.

The Pupils' Performance Report for Bhutan Higher Secondary Education Certificate (BHSEC XII) for December 2007 examination was published for the first time in the year 2008, one year after the then BBE took over the Class XII examination from CISCE, India in 2006.

Initially the Pupils' Performance Report for BCSE and BHSEC were published as separate volumes. For the last few years, both the level of examinations is published in one volume. Since 2012, the Language and Culture Studies (LCSC X & XII) examination has also been a component of the analysis covering all the high-stake council examinations conducted by the Bhutan Council for School Examinations and Assessment (BCSEA).

This report is published annually to provide feedback to schools, teachers and other stakeholders on the candidates' performance in the council examinations.

The BCSEA would like to thank all the schools and Supervising Examiners for their unwavering support in conducting the examinations successfully as always.

Further, we would also like to thank the teachers and other participants who attended the Examination Marking Centre.

We look forward to providing similar reports to provide meaningful feedback to support the teaching learning process.

ANSWER SCRIPT MANAGEMENT

This activity starts two days before the marking of the answer scripts. During this process, the examination materials from the centres are handed over by the Camp Coordinator of the Marking venue to the Chief Manager. This is followed by preparing the answer scripts for marking by the managers. The administrative number assigned for each candidate is written on the specified space on the cover page of each subject/ paper and the attached leaflet with the candidate's identity removed. This maintains confidentiality and ensures fairness in marking. Then the answer scripts are kept ready for issuing to marking rooms by arranging them into lots, with each lot containing about 50 answer scripts.

MARKING

- Before the marking begins, the model answers and the marking schemes are thoroughly discussed and standardized in subject groups;
- The respective chief markers are responsible for the movement of answer scripts from the management to the marking rooms;
- To maintain consistency in marking and reduce subjectivity, the markers assess the same items for the population who appeared the examination;
- To ensure accuracy of marks awarded for each item, the marked answer scripts are further cross-checked and verified that all items are corrected;
- To ensure consistency in marking and the award of marks, the chief markers conduct a random re-evaluation of marked answer scripts providing feedback to the markers;
- Then the marked question-answer scripts are compiled in ascending order and handed over for item tabulation. This ensures zero error in the award of marks by the

markers;

- The Subject Coordinators provide logistic and professional support to their respective subject groups during the marking process.

TABULATION

Double entry of marks from the marked answer scripts was initiated in the year 2018 to ensure accuracy. This involves two independent entries of marks from the marked answer scripts into the item and mark capturing system by the tabulators:

Item Tabulation

- Item tabulators enter all the candidates’ marks item wise for each subject. This ensures all marks are entered ‘item wise’ and additions done correctly.

Mark tabulation

- Mark tabulators enter the totalled marks for each question on the cover page against candidates.

The tabulators don’t punch in the index numbers. This is read by a barcode reader and mark entry slots pop up automatically for each item for the item tabulators and for each question for the mark tabulators. The total marks entered by the item tabulators and mark tabulators are tallied after a specified period and errors rectified. This ensures that marks entered correspond to the correct index number minimizing human error and 100% accurate results for the candidates.
